

Clinical & Translational Issues Working Group

Traditional translation is from Petri to Patient (e.g., Fleming with penicillin)

Multiscale modeling connects levels to fill in intermediate scales from both research and clinical.

Marc Garbey, Bill Lytton

Plan Workshop and Special Issue

- Highlight difficulties (and failures) as well as successes
- Tentative date: early December 2014; (~10 invited/30 contributed talks)
- Tutorial/Round table on medical quality assessment
- Proceedings to be published in *J of Computational Surgery*
