

DONNA R. LOCHNER

Donna R. Lochner is Associate Director at the U.S. Food and Drug Administration's Office of Science and Engineering Laboratories. She manages research programs and initiatives aimed at advancing the application of computational modeling and simulation for FDA's premarket regulatory review, and promoting FDA's Center for Devices and Radiological Health's regulatory science research. Prior to her current position, she was Deputy Director of the FDA's Division of Cardiovascular Devices where her primary responsibilities included the review and approval of cardiovascular medical devices distributed or clinically investigated in the U.S. She has also served as the Chief of FDA's Intraocular and Corneal Implants Branch. Prior to joining the FDA, Ms. Lochner worked in regulatory affairs and engineering for Cordis Corporation. She received a B.S. degree in Chemical Engineering from the Pennsylvania State University.
